

TRUST STEALTH™ HELMET PAD SYSTEM

Delta Three Oscar™ uses rate sensitive, soft and flexible D3O® materials for shock absorption and impact protection applications.

Constructed using D3O® Decell material, the TRUST Stealth™ Helmet Pad System provides extreme comfort and high performance protection, exceeding the required level of protection at 10ft/sec by 45% on average and maintaining consistent performance on second impact.

The 7-pad and 9-pad systems both fit most ground combat helmets. Each helmet pad in this replacement/upgrade system features a unique geometry that allows the pad to fit the shape of the head and offers superior deceleration under blunt impact tests vs. market leading competitors.

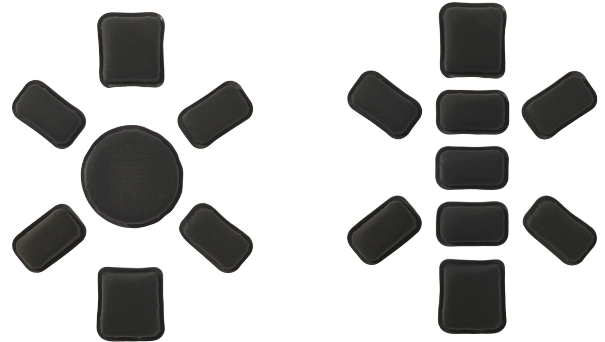

PRODUCT FEATURES

- High Performing
- Patented D3O® technology
- Composite solution
- Optimal performance ensured by unique auxetic geometry which allows the D3O® impact protection material to conform to the shell whilst remaining perpendicular to the direction of impact
- Fully customisable with hook and loop attachment
- Lined with technical wicking fabric
- 9-pad helmet system available for enhanced comfort
- Performance stability across multiple impacts
- Integrated comfort liner for each pad
